

PAYAS GOYAL

+852-54894642 | payas.goyal@outlook.com | [LinkedIn](#) | [GitHub](#)

Software Engineer with 2+ years of experience in n-tier architecture and microservices development using Java, Spring Boot, and .NET Core. Strong background in building scalable enterprise solutions with focus on OOP principles.

EXPERIENCE

Wizpresso Limited

May 2023 - October 2024

Full Stack Software Engineer

Hong Kong

- Boosted user engagement by 10% by implementing a robust, **database-driven n-tier notification service** in **C# using .NET Core**, serving 1,000+ active users with in-app and email notifications, demonstrating strong OOP principles.
- **Migrated a legacy product from Vue 2, Quasar v1 to Vue 3, Quasar v2, integrating TypeScript** to resolve known bugs and reduce page load time, thereby enhancing overall app performance.
- Constructed a Governance, Risk, and Compliance (GRC) platform using **Vue.js, .NET Core and SQL Server**, automating corporate disclosure screening and reducing manual review time by 60%.
- Developed an **interactive data visualization tool using Vue.js and Chart.js**, leveraging multiple graph types for comprehensive benchmarking analysis on an ESG intelligence platform; Implemented a **paywall feature for restricted access** and managed deployment to on-premises servers using Kubernetes.

OKX

August 2022 - February 2023

Backend Software Engineer

Hong Kong

- **Decreased non-compliant trading attempts** by implementing geographic-based restrictions within the API Gateway microservice using **Java, Spring Boot**. Utilized internal team's APIs to **accurately verify user locations using IP addresses** and determine trading eligibility as established by the compliance team.
- Developed an **efficient data catalogue service using n-tier architecture and Spring Boot** for 1000+ USDC options, ensuring fast response times and seamless API Gateway integration.
- Collaborated directly with business stakeholders to collect requirements and develop features for the trading platform, ensuring alignment with complex use cases.

CIGP HK

June 2021 - June 2022

IT Intern

Hong Kong

- Developed **automated workflows using C#, Azure, Microsoft Power Automate, PowerShell** to extract client's bank transaction data, transform them to meet the standards of the trading operations team, and seamlessly integrate into downstream systems to facilitate weekly reconciliation tasks.
- Engineered an **end-to-end Proof-of-Concept using Blazor, integrated with Azure cloud for Microsoft Teams**, which was used by over 50 employees to monitor their various compliance training progress.
- Developed and managed a **comprehensive audio auditing tool** for the Compliance team to examine portfolio review call recordings, **utilizing Blazor, C#, Power Automate, Microsoft Graph, Azure Blob Storage**.
- Managed IT infrastructure, documented user guides, provided IT support, and evaluated new technologies.

EDUCATION

City University of Hong Kong

Hong Kong

Bachelor of Engineering in Computer and Data Engineering

September 2018 - June 2022

PROJECTS

Movie and TV Show Display App [GitHub](#) | [Demo](#)

Responsive React app for browsing movies and TV shows with dynamic search, user-friendly navigation and optimized for all devices

- **Technologies used:** React

Calendar Web App [GitHub](#) | [Demo](#)

Calendar Application featuring OAuth authentication, email notifications, and data import functionalities, deployed to Heroku

- **Technologies used:** Flask, Python, JavaScript

Web App for Microsoft Teams Store

Full-stack web app for Teams Store integrating custom APIs for monitoring compliance trainings

- **Technologies used:** Blazor, .NET Core, C#, SQL

TECHNICAL SKILLS

Frontend:	Vue.js (Competent), React (Beginner), Blazor, Flutter, Quasar
Backend:	.NET Core (Competent), Spring Boot (Competent), Flask
Languages:	Javascript (Competent), Java, C# (Competent), TypeScript, HTML/CSS, Python, SQL, JSON
Database:	MS SQL Server, MySQL, Firebase
Developer Tools:	Google Cloud, Azure, Git, Charts.js, Jira, VS Code, Visual Studio, PowerShell, Linux
